

Science

at Marden Primary Academy

Vision

At Marden Primary Academy our vision is to provide an ambitious and exciting science curriculum which enables children to explore, investigate and discover the world around them. Children are motivated and empowered by hands on, practical learning opportunities to be curious, ask questions and seek answers.

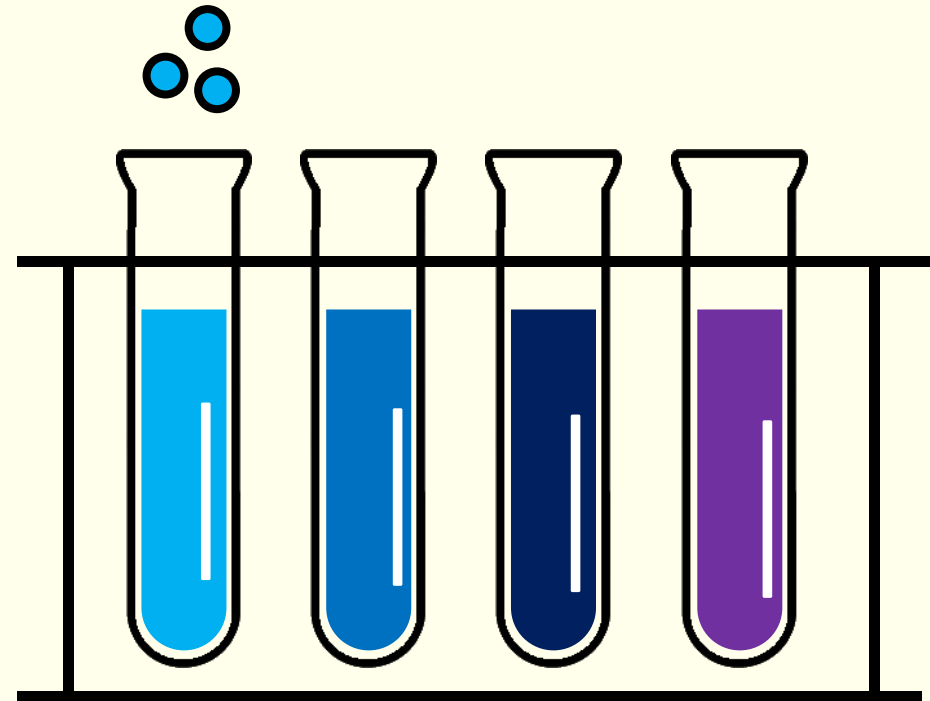

Science

at Marden Primary Academy

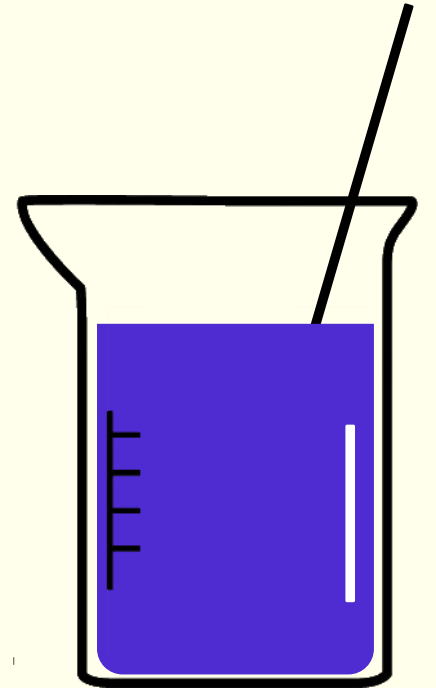

Science at Marden Primary academy is good when:

- we are knowledgeable
- we are challenged
- we are reflective
- we are engaged
- we are curious
- we are collaborators
- we are explorers
- we are inspired

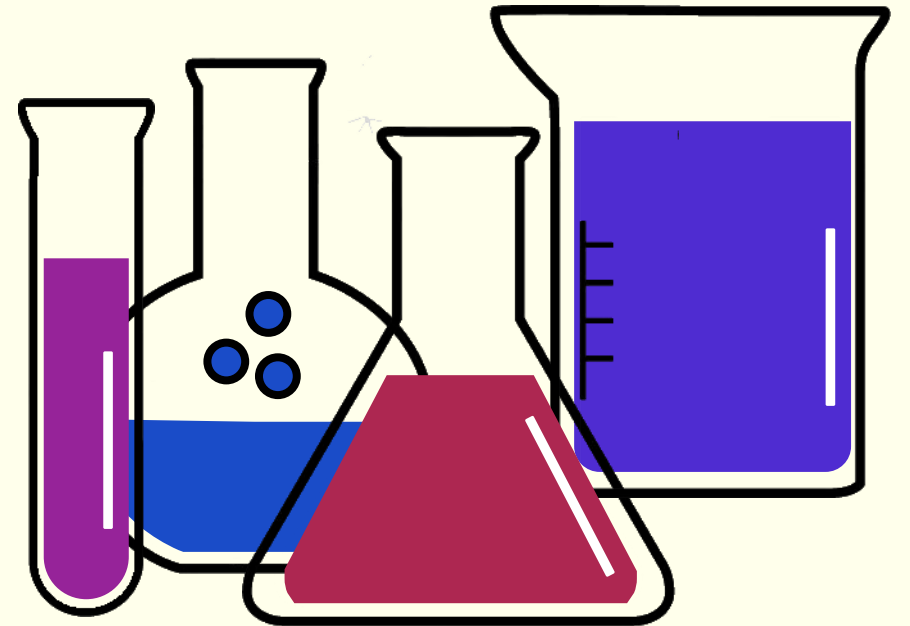

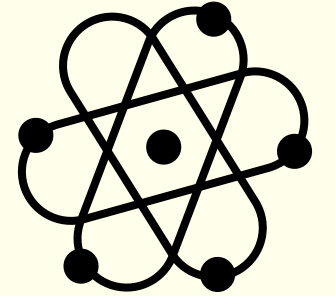

We are knowledgeable

Learners develop and use disciplinary and substantive knowledge. Teachers are confident in their subject knowledge

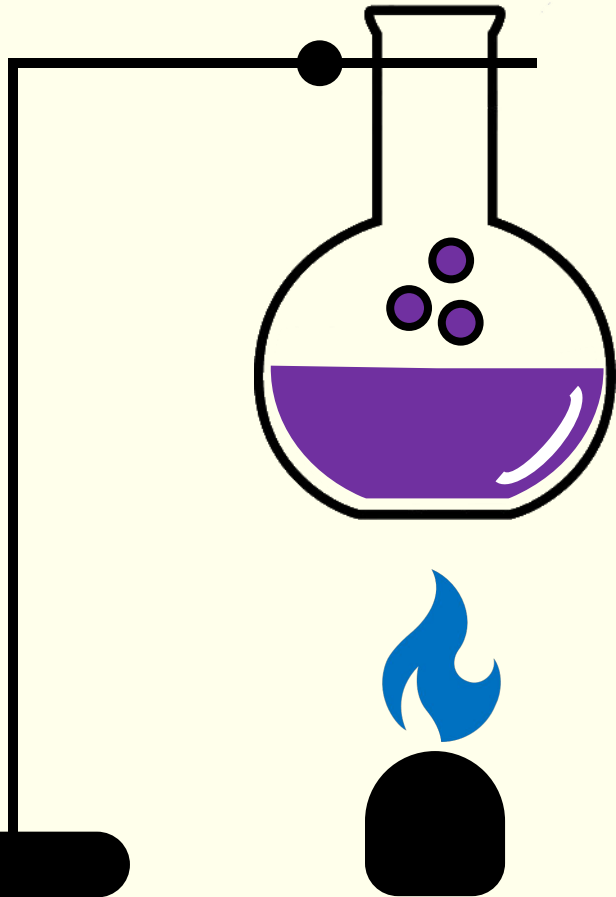

We are challenged

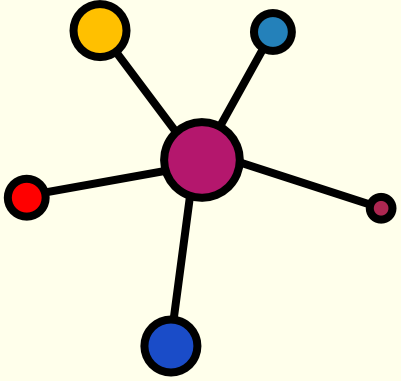

We are challenged to develop our scientific skills alongside the essential science knowledge

We are reflective

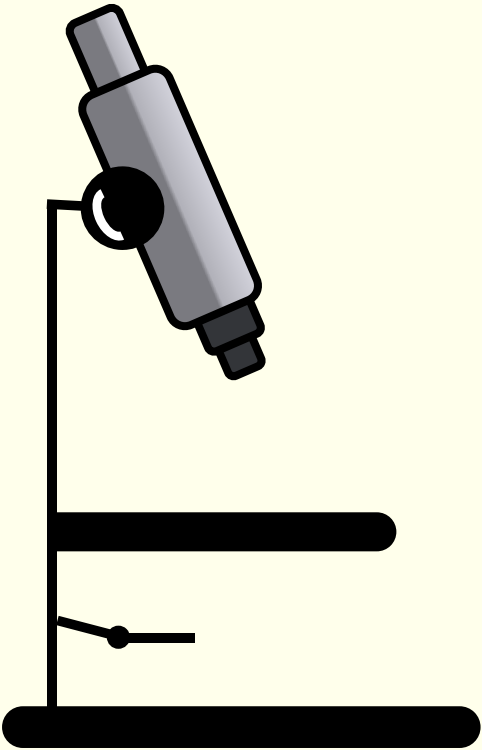

We reflect on our prior learning and build new learning as a result

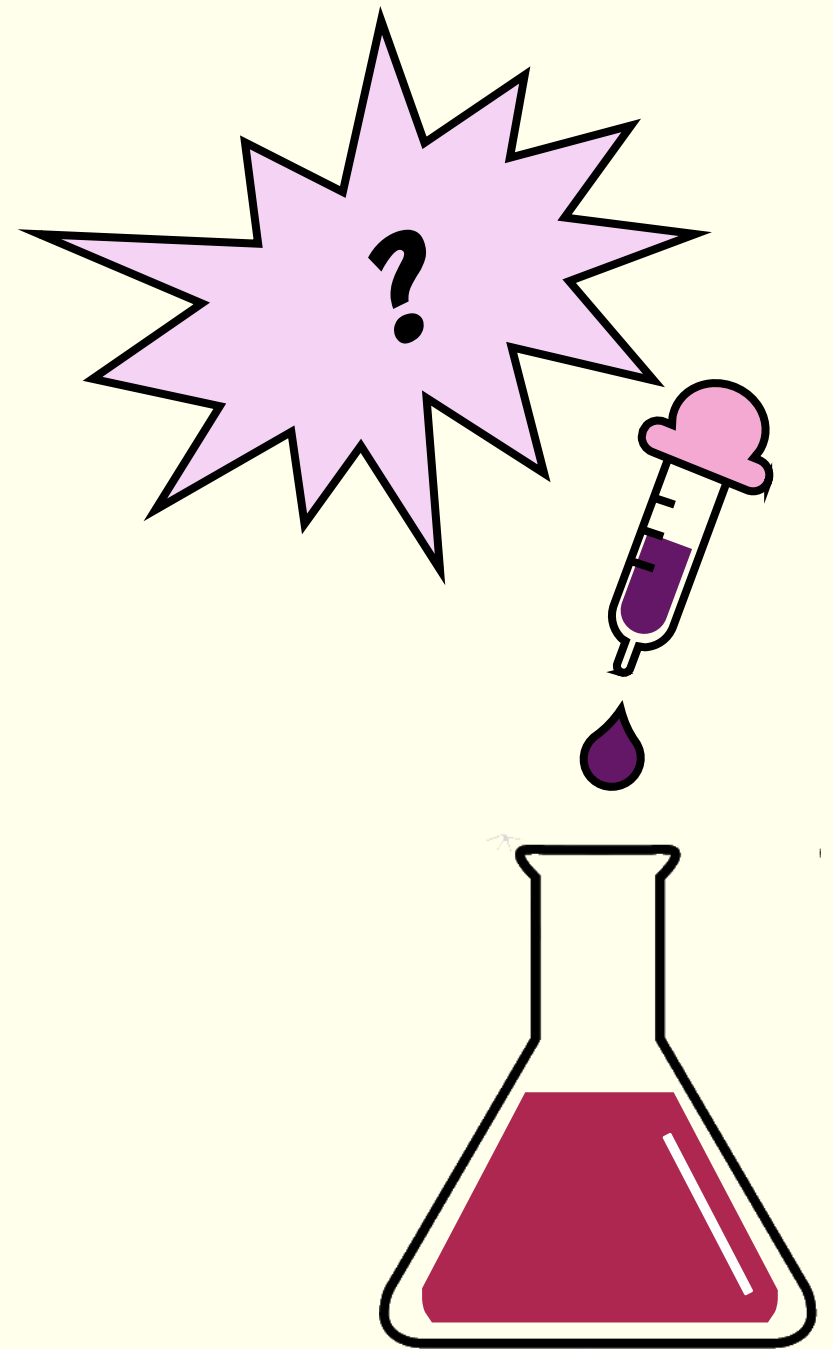

We are engaged

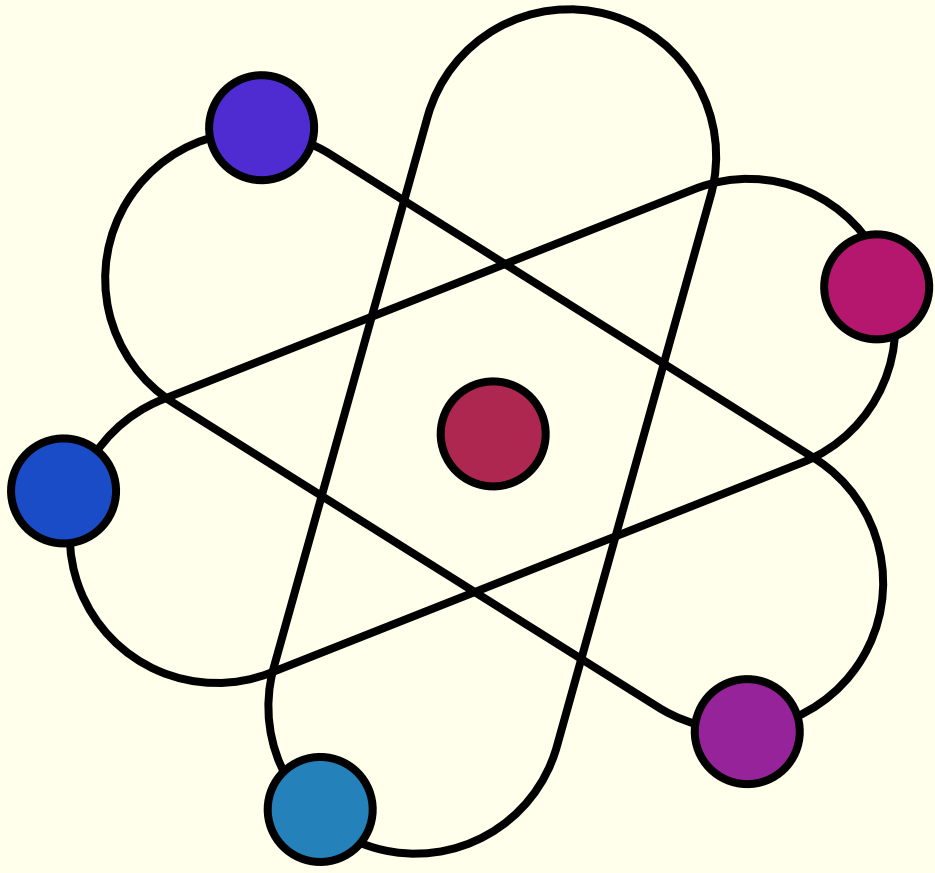

Learners are provided with fun, engaging and practical learning experiences.

We are curious

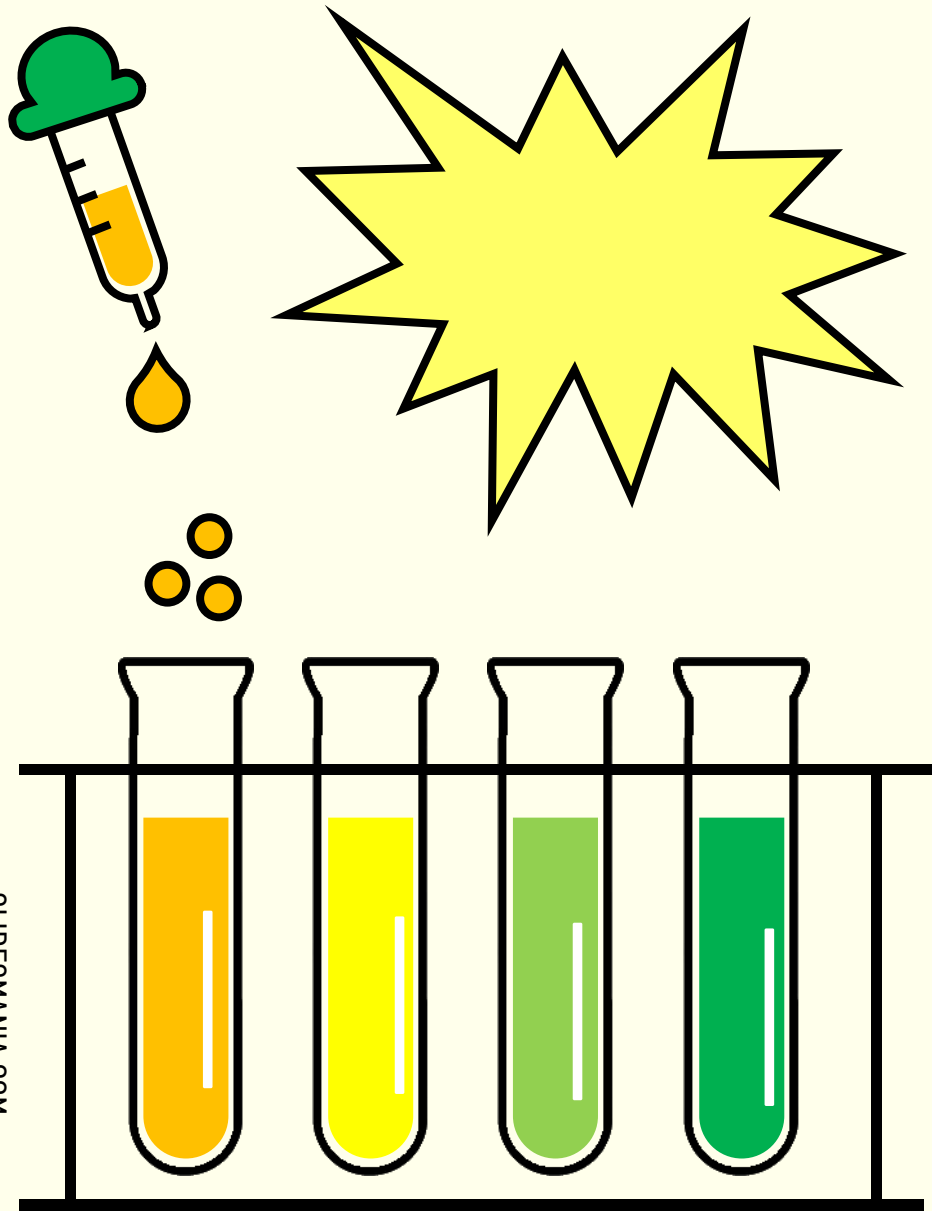

Learners actively explore new ideas by asking questions and seeking answers

We are collaborators

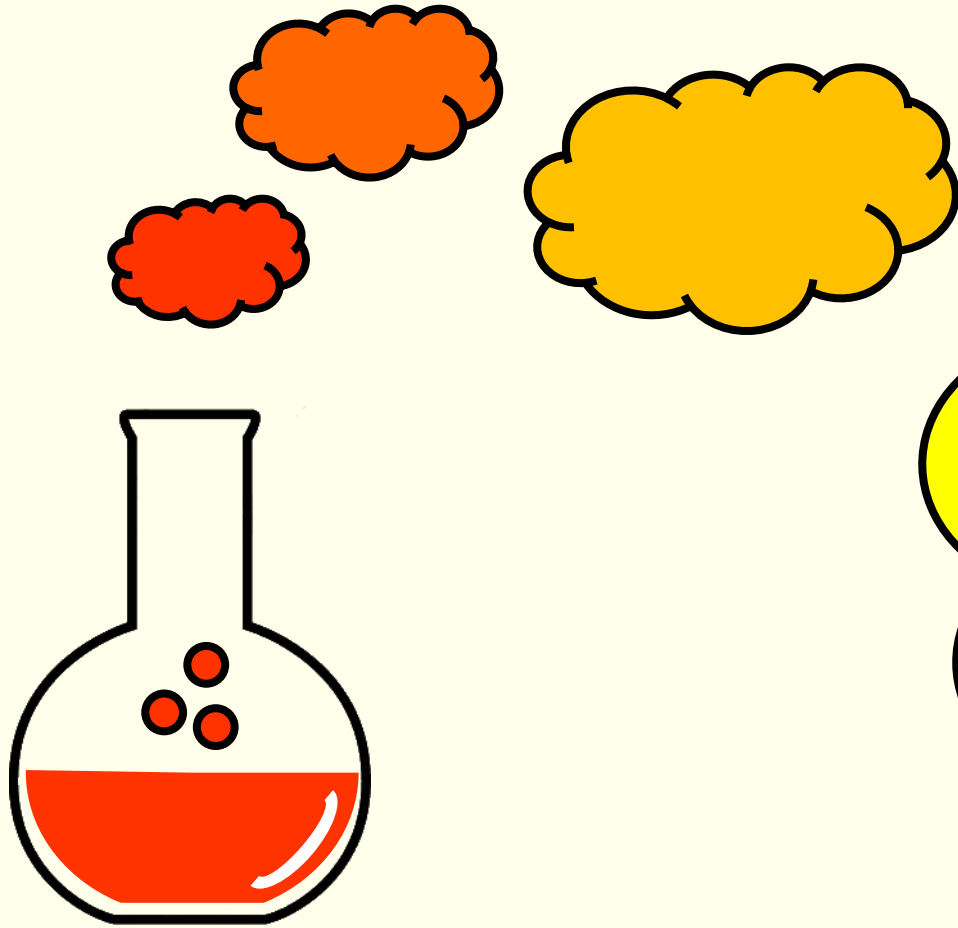

Learners work together to
discover, develop, share
and celebrate learning

We are explorers

We explore learning opportunities within the whole school environment, inside and outside

We are inspired

We are inspired by hands on practical learning that helps us develop the core scientific skills and knowledge we need to be citizens of the world.
